

## POLYPROPYLENE (PP) - Grades & Applications

Reliance Polymers offers a wide range of Homopolymer, Random Copolymer and Impact Copolymer grades in Polypropylene.

Homopolymer grades are available in a wide range of melt flows. They are carefully designed to suit the requirements of various applications like blow and injection moulding, BOPP films, woven sacks, FIBC and fibres.

Random Copolymer grades are designed keeping in mind the critical requirements of pipes and fittings and clarified applications in blow and injection moulding and ISBM.

Impact Copolymers are tailored to meet the requirements of various applications like furniture, paint pails, caps and closures, luggage, crates, appliances and compounding.
