

2019: Version 1

To Whomsoever It May Concern

SHELF LIFE DECLARATION

Polyvinyl Chloride resin shelf life:

PVC resin is an inert material, it does not absorb moisture & does not react with atmospheric gases under ambient conditions. If the bags are stored under the right conditions, data from actual usage suggests that the resins are usable without any problem even after a period of 5 years.

The above given statement is valid only for material stored in original intact unopened, undamaged package and free of externally contamination with dirt or any other chemicals.

(Disclaimer: The above given information is intended only for guidance purpose & technical support of the intended recipient. This information is not to be used for any litigation purpose)

(Computer generated statement, hence does not require any signature)
